

# Welcome to Current Colours™

## Benefits of Current Colours system

- always up to date with colours that are right for you
- swatches in your Style File™ wallet will coordinate with the colours in the marketplace
- a guide to shades and hues that are most flattering for you
- eliminates wasted time and money purchasing incorrect colours

## Determining Your Colours

To analyze your colours these factors are considered:

- your skin tone characteristics \*\*
- your eye colour
- your current hair colour
- your personality

\*\*In skin tone as in art, colour has 6 characteristics:

- warm
- cool
- light
- deep
- muted
- bright

Most have a combination of 2 or 3 of these characteristics.

## Two Fashion Seasons

- spring/summer
- fall/winter
- At the beginning of each fashion season, usually late February and late August, the new styles and colours for the coming fashion season arrive in the stores.
- New shades are introduced, new hues become popular and some colours become outdated.

## The Current Colours™ System

- Current Colours has 6 categories; people may be a combination of these categories
- your Current Colours™ palette is designed specifically for you
- use your art swatches to guide you when shopping; they do not have to match exactly to fabrics
- your colours may change over the years
